PROFESSIONAL SUMMARY

Results-driven data professional with demonstrated expertise in data analytics, project management, and geospatial analysis, seeking a role where complex data challenges meet strategic decision-making. Proven ability to translate technical findings into clear, actionable insights for cross-functional stakeholders, driving informed decisions and measurable outcomes. Adept at rapidly acquiring new competencies and leading collaborative teams in deadline-driven, high-accountability environments where data quality and precision directly influence organizational strategy.

TECHNICAL SKILLS

Data Analysis & Visualization: Power BI · Excel · Tableau · SQL · MySQL · Python

Geospatial Analysis (GIS): ArcGIS Pro · ArcGIS StoryMaps · Social Explorer · OpenStreetMap · Leaflet

Development & Tools: JavaScript · HTML · CSS · PHP · Oracle · Linux · GitHub · VS Code · Claude AI

Project Management: Airtable · Box · Microsoft 365 (Microsoft Project, Forms, Teams, SharePoint, PowerPoint)

PROFESSIONAL EXPERIENCE

Data Analyst

Feb 2026 – Present

NYC Office of Technology & Innovation · Brooklyn, NY

- Maintain and update daily Power BI and Tableau dashboards tracking Big Apple Connect program metrics, ensuring city leadership has accurate, up-to-date data to guide broadband expansion decisions across NYCHA developments.
- Coordinate weekly LinkNYC usage reporting by consolidating and updating datasets across Airtable, Box, Excel, and the NYC Open Data Platform, maintaining data integrity and consistency across systems.
- Developed a LinkNYC Community Impact Assessment GIS map using ArcGIS, identifying every Link kiosk within a 500-foot buffer to visualize resident proximity to public internet access and inform digital equity planning.

Digital Access Analyst

Dec 2024 – Jan 2026

NYC Office of Technology & Innovation · Brooklyn, NY

- Managed and analyzed key datasets supporting the Big Apple Connect initiative, tracking enrollment, service delivery, and access metrics across NYCHA developments; developed data workflows, visualizations, and GIS StoryMaps to surface and communicate structural equity gaps.
- Designed and deployed a NYCHA resident survey on Big Apple Connect satisfaction and enrollment awareness; cleaned and structured response data and built a Power BI dashboard to present findings to stakeholders.
- Served as a cross-functional data liaison between internal teams, ISPs, and city agencies, aligning reporting standards, resolving discrepancies, and ensuring program metrics were actionable and consistent.

Digital Equity Policy Analyst

Jan 2024 – Nov 2024

NYC Office of Technology & Innovation · Brooklyn, NY

- Owned end-to-end digital equity data management, collection, cleaning, analysis, and reporting to support executive decision-making and track citywide progress in closing the digital divide.
- Identified a critical gap in citywide visibility of public computer access points, surveyed **400+** computer centers across NYC, and led cross-functional collaboration on data cleaning, analysis, and the initial prototype design of the NYC Public Computer Center website, resulting in a publicly accessible inventory dataset published on NYC Open Data and a live city resource used by residents citywide.
- Expanded the Connected Communities initiative through targeted relationship-building with internal teams and external stakeholders, facilitating qualitative community engagements to strengthen OTI's digital inclusion programs.

Technology Intern

Jan 2020 – May 2020

Shutterstock · New York, NY

- Developed comprehensive technical documentation to improve internal team understanding of customer platform interactions, streamlining workflows and reducing knowledge gaps.

- Conducted data collection and analysis in collaboration with cross-functional teams, translating findings into actionable recommendations to enhance end-user satisfaction and platform performance.

Patient Insurance Coordinator

Apr 2016 – Aug 2019

NY Med · Forest Hills, NY

- Coordinated end-to-end insurance documentation workflows for **100+** patients daily, ensuring accurate data collection, timely submission, and seamless communication between physicians, insurance providers, and internal teams.
- Led patient-facing education initiatives advising patients on insurance benefits and office policies, driving measurable improvements in retention and satisfaction.
- Served as the primary liaison between external insurance companies, physicians, and internal staff, managing competing priorities and ensuring consistent, accurate information flow across all stakeholders.

EDUCATION

B.S. in Information Systems

May 2025

CUNY School of Professional Studies, New York, NY

A.A.S. in Computer Information Systems

May 2022

CUNY New York City College of Technology, Brooklyn, NY
